

Press release, March 2022

swissQprint showroom at Fespa Berlin

Visitors of the Fespa Global Print Expo in Berlin may experience swissQprint's new developments: UV flatbed and roll to roll printers that create added value and help to give users a competitive edge. Not least thanks to special applications.

The swissQprint showroom will be open to visitors at Fespa Berlin (hall 1.2, stand C30) from 31 May to 3 June 2022: live demonstrations and a gallery to see and touch a wide range of inspiring applications, hosted by the swissQprint team and representatives of the global partner network.

Flatbed generation 4

The high output quality of the new swissQprint flatbed printers gives users a competitive edge. Thanks to the latest print head technology and mechanical enhancements.

Karibu roll to roll printer

The dedicated roll to roll printer from swissQprint has unique features that streamline the workflow and keep quality and output at a high level. Spot colours and a highly flexible varnish expand the range of applications.

Neon inks for UV printing

Only from swissQprint: Bright signage on any material and in any format. Neon pink and neon yellow with neon green and neon orange colour variants. Fluorescent under black light.

"No video or photo can reproduce the print quality of our flatbed generation 4," says Carmen Eicher, Chief Marketing and Sales Officer at swissQprint, "you also have to see our new neon inks and other special applications with your own eyes."
