swissQprint

Press release, September 2025

swissQprint Spain is relocating to larger premises

After seven years of solid growth, swissQprint Spain is relocating to a more spacious facility within Barcelona to better serve its customers and provide the team with much-needed space.

As Jorge Suberviola Freire, Managing Director of swissQprint Spain, explains: "We've outgrown our current space." Founded seven years ago, the swissQprint subsidiary has significantly grown, necessitating a larger showroom, increased storage, and more office space.

Extended space and services

The new facility spans 500 m² across two floors. The new showroom will cover 185 m², more than double the current size, enabling swissQprint Spain to showcase up to three printers simultaneously. This expansion will allow interested parties to experience almost the full range of printers live.

The new premises will also include a dedicated area for refurbishing second-hand printers, which are increasingly being traded in as customers upgrade to the latest printer models. The office space will expand to 50 m² while storage capacity will increase to 165 m², which is almost five times the current capacity. This will ensure reliable consumables supplies to the growing customer base.

Easy access

swissQprint Spain will officially begin operations at the new facility at the bustling industrial area "Parque Empresarial Granland" on 15th September 2025. The building offers easy access and includes a 30 m² unloading space that also serves as a parking area for visitors.

As the team prepares to welcome customers to the new premises, the company remains committed to delivering exceptional service. The move marks an exciting new chapter for swissQprint Spain, promising continued growth and success.
