

Press release, July 2025

swissQprint expands with new facility in the USA

The Swiss manufacturer of large format printers, swissQprint, has announced the construction of new premises in the USA. This marks a significant step forward in the company's growth in North America. The new facility will enhance swissQprint's ability to serve its customers and showcase its cutting-edge technology.

Kilian Hintermann, CEO of swissQprint, shared his enthusiasm about the project: "We continue to see North America as a growth market. This new facility for our US subsidiary is a testament to our commitment to serving our North American customers even better." swissQprint America is currently headquartered in Elgin, IL, providing sales and after-sales services, with an additional demo center located in Irvine, California.

Easy access and enhanced service

The new facility will be situated on 3 acres within West Dundee, Illinois, strategically located approximately 10 minutes closer to Chicago O'Hare airport than the current premises. Erik Norman, President of swissQprint America, explained: "The heart of the new facility is the expanded showroom to feature our large format printers and applications, along with increased capacity for our applications and service teams. All of this designed so that we can deliver exceptional support and experiences for our customers."

Facility features with sustainability commitments

The new building will span 24,780 ft². Key features include a 4,757 ft² showroom and hospitality area, a dedicated training center for individual or group applications training, and 2,192 ft² dedicated to machine refurbishing and service. Also, the building will have significantly expanded warehouse and office space compared to the existing Elgin premises. Overall, the US team looks forward to a 130% increase in space.

Reflecting swissQprint's commitment to environmental responsibility, approximately 400 solar panels are planned to be installed and to supply power from renewable resources. Heitman Architects Inc. designed the building, and construction will be done by The DSI Group, both of Chicago, IL. swissQprint was represented by Bespoke Commercial Real Estate.

Timeline and outlook

The ground-breaking ceremony for the new building took place on July 9, 2025, and the facility is scheduled to be completed by mid 2026. The site provides an option to expand an additional 15,000 ft² to accommodate future growth. While leaving the Elgin base, swissQprint America will keep the Californian demo center to cater to the Western States and Western Canada.

About swissQprint

swissQprint is a privately owned Swiss manufacturer of large format printers. High precision, outstanding performance, exemplary service, and exceptional reliability drive swissQprint's innovation in digital printing. More than 220 employees are proud to stand behind the swissQprint name.

From signage and POS displays to art reproduction and bespoke industrial applications, swissQprint customers can always rely on state-of-the-art inkjet solutions. Providing the local service and quality swissQprint is known for, the US office (est. 2016) is one of six subsidiaries that support swissQprint's products around the world.
